

UniEase – Unified Smart Campus Life & Academic Assistant

Project Type

Full-Stack Web Application

Project Title

UniEase– Unified Smart Campus Life & Academic Assistant

Core Idea

UniEase is a **single digital platform** that solves daily student problems related to academics, campus life, and career readiness by integrating them into **one intelligent, centralized system**.

Project Motivation

Students typically struggle with fragmented systems leading to: - Missed announcements - Academic confusion - Delayed hostel issue resolution - Unclear placement guidance - Poor visibility into library, transport, and mess services - Hesitation in asking doubts

CampusConnect+ eliminates fragmentation by unifying all campus interactions.

Implemented Modules

Unified Academic & Announcement Hub

- Notes sharing
- Announcements and updates
- Timetables and events
- Deadline tracking with reminders

Syllabus Progress & Examination Information

- Subject-wise syllabus tracking
- Completed vs pending topics
- Exam timetable
- Hall and seating details

- Automated reminders

Anonymous Doubt Clearing & Mentorship

- Anonymous question posting
- Peer, senior, and faculty responses
- Topic tagging
- Upvote-based answer ranking

Lost & Found Management

- Lost item postings
- Found item postings
- Category and location tagging
- Item return status tracking

Hostel Complaints Tracking

- Complaint registration
- Status tracking (Open / In Progress / Resolved)
- Admin responses
- Resolution history

Transport & Mess Information

- Bus routes and schedules
- Delay notifications
- Daily mess menu
- Student ratings and feedback

Smart Library System

- Book availability search
- Borrowing history
- Due date and return reminders
- Library seat availability

Placement & Internship Hub

- Job and internship postings
- Application deadlines
- Skill requirements
- Learning and preparation resources

Personal Academic Vault & Performance Insights

- Certificate storage
- Attendance and result tracking
- Marks input

- Required-marks prediction
- Improvement suggestions

1 Central Dashboard & Notifications

- Personalized dashboard
- Alerts and reminders
- Pending actions summary
- Read/unread notification management

Technology Stack

Layer	Technology
Frontend	HTML, CSS, JavaScript
Backend	Python, Django
APIs	Django REST Framework
Database	MySQL
Version Control	GitHub

Overall System Architecture

Team Structure (4 Members)

Member 1 – Backend Core

- Authentication and role management
- Academic hub
- Notification system

Member 2 – Student Life Modules

- Hostel complaints
- Lost & Found system
- Transport and mess modules

Member 3 – Academic Support

- Doubt clearing system
- Syllabus and exam management
- Library system

Member 4 – Career & Personal Modules

- Placement and internship hub
- Academic vault
- Performance prediction
- UI integration

Development Timeline (7–10 Days)

- Day 1–2: Project setup, authentication, database design
- Day 3–4: Academic and student life modules
- Day 5–6: Library, placement, and doubt modules
- Day 7: Dashboard and notifications

- Day 8–10: Testing, UI enhancement, documentation
-

Resume Description

Developed **UniEase**, a unified smart campus platform using **Django REST APIs and MySQL**, integrating academic management, student support services, hostel complaints, library systems, placement guidance, and academic performance insights.

Future Enhancements

- Mobile application
 - AI-based recommendations
 - Student chatbot assistant
 - Push notifications
 - LMS integration
-

Conclusion **UniEase is high-impact, scalable, and resume-strong project** suitable for: - Job applications - EY NextGen 4.0 capstone submission - B.Tech final-year major project

It demonstrates real-world problem solving, clean architecture, and strong full-stack implementation.
